

CJ Jeffrey

ServiceNow Delivery Leader & Strategic Solution Consultant

Plano, TX · cj.r.jeffrey@gmail.com · [LinkedIn](#) · [GitHub](#)

SUMMARY

ServiceNow delivery leader rooted in process consulting: builds and mentors delivery teams while staying hands-on where it counts most, in discovery, process, and solution design. Deep experience spanning enterprise delivery leadership, complex scoped-app and integration architecture, and AI-enabled solution design. Skilled at discussing the "art of the possible" with clients: listening closely to untangle competing requirements and helping them articulate true needs, then designing scalable, maintainable platform architectures that preserve out-of-the-box integrity. Bridges a compelling pre-sales vision and realistic, battle-tested execution. Ships AI as a real, outcome-tied, secure capability built into delivery, not experimentation or hype.

EXPERIENCE

CDW — Advisory Solutions Supervisor

Oct 2021 – Jul 2026 · Plano, TX

ServiceNow Practice

Led both **advisory teams** (Business Process Consultants / Business Analysts) and **ServiceNow domain verticals** — ITSM, HR, and SPM — with cross-functional teams of technical and advisory roles reporting up. Executive escalation point and client sponsor across complex engagements; trusted advisor to both clients and internal solution architecture teams. Practice spans enterprise ITSM, custom applications, **Performance Analytics**, and **AI-enabled workflows**.

- Managed cross-functional delivery teams across multiple domain verticals (ITSM, HR, SPM), owning staffing, mentoring, and delivery quality for both technical and advisory consultants.
- For the last ~1.5 years, held a **direct delivery role on top of team leadership** — personally leading custom process and scoped-app design when no advisory resource had the depth for it.
- **Analytics differentiator:** internal SME sought by peers, sales architects, and engagement managers for scoping, designing, and delivering Performance Analytics, custom dashboards, SLAs, and complex KPI configurations; advised enterprise clients on KPI design and Performance Analytics architecture for measurable outcomes.
- **AI differentiator:** engineered agentic AI frameworks (Now Assist, custom LLM-grounded story generation) into real delivery — not just experimentation. See PlayGrid (Knowledge 2025) and the SAP scoped-app engagement below.
- Partnered closely with pre-sales and architecture on complex opportunities — ensuring proposed solutions are scalable, functionally realistic, and aligned with delivery capabilities.
- Drove CSAT performance strategy while mentoring consultants in scalable design patterns, structured requirements, and platform best practices.

Key Enterprise Engagements

- **Fortune 500 Global Consumer Services B2B — Custom Scoped App & SAP Integration (2024–2025):** Primary trusted advisor and technical solution designer for a greenfield ServiceNow Scoped App. Architected the app as the primary system of engagement / approval layer atop a complex multi-tenant SAP instance. Preserved OOTB integrity via native catalog capabilities; strict scoped isolation from SAP data. Engineered an agentic AI framework grounded in a master design document to rapidly generate accurate, cross-validated first-draft Agile stories for human review.
- **Fortune 50 Healthcare Enterprise — Custom Scoped Application (2025):** Led discovery translating complex operational requirements into a scalable platform design; architected a custom data model and workflow orchestration. Implemented bi-directional integrations bridging specialized workflows with external systems to reduce manual handoffs.

CDW — Sr. Business Process Consultant

Apr 2021 – Oct 2021

- Led process discovery and requirement workshops, translating business objectives into ServiceNow-aligned solution designs.
- Collaborated with C-level stakeholders to align platform capabilities with strategic goals and gain buy-in for process improvement.
- Authored functional designs, stories, and defect documentation; identified optimization opportunities via no/low-code capabilities.

Linium / Ness Consulting — Business Process Consultant

Jan 2019 – Apr 2021

Acquired by Ness Digital Engineering (~2018, holding co); later spun off to Cognizant (~2021); promoted to Senior Associate.

- Maintained 4.5+ average CSAT as a preferred consultant for Reporting, Performance Analytics, and Predictive Intelligence engagements.
- Gathered requirements and implemented scalable no/low-code analytics solutions tailored to executive visibility needs.

Chipotle Mexican Grill — IT Service Level Manager

Mar 2017 – Jan 2019

- Defined and implemented an enterprise KPI framework for individual, team, and overall service performance.
- Designed, implemented, and maintained a new ServiceNow CMDB (Business Services, Technical Services, Application layers).
- Led cross-functional (IT, HR, Security) workshops to establish service tiering; dramatically improved Incident and Request Management via the Service Portal.

INNOVATION & AWARDS

- **Knowledge 2025 Hackathon — Honorable Mention:** Prototyped *PlayGrid*, a custom App Engine solution showcasing AI-enabled workflows (Decision Tables, UI Builder, Now Assist); framed technical capability into an executive-ready business narrative.
- **CDW CEO Continuous Improvement Award (2023):** Executive recognition for optimizing internal delivery processes and mentoring peers to elevate practice performance.

PLATFORM EXPERTISE & SKILLS

- **Core:** ServiceNow ITSM, App Engine (Custom Scoped Apps), CMDB Design, Service Catalog
- **Analytics & AI:** Performance Analytics, Predictive Intelligence, Now Assist Integration, UI Builder, Splunk, Tableau
- **Strategy:** KPI Strategy, Service Level Management, Platform Governance, SAP System-of-Engagement Strategy
- **Leadership:** Delivery practice leadership, consultant mentoring, pre-sales/architecture partnership, executive escalation, CSAT strategy
